

To Whom It May Concern:

I have worked with Ohio Employee Health Partnership (OEHP) for the past 7 years, starting in my capacity as Corporate Risk Manager for a regional light industrial staffing firm and then, after a job change, in my role as Vice President of Risk Management and Operations for Nesco Resource, a national Engineering & IT, Accounting & Finance, and Light Industrial & Clerical staffing firm.

I have found everyone that I have dealt with at OEHP over the years to have a strong understanding of the overall Workers' Compensation system within Ohio as well as have a high level of competency in specific regards to medical treatment, allowable and related medical conditions, and overall injury management.

Operating a light industrial staffing firm, Nesco deals with many diverse work environments and injury situations. OEHP's responsiveness at the on-set of a claim helps our risk management team get control of the claim quickly, mitigating costs, and returning employees to work full duty as soon as medically feasible. Additionally, OEHP's hand on approach to claim oversight has helped Nesco identify handicapping opportunities as well as identify potentially fraudulent claimants.

I strongly recommend utilizing OEHP as your Managed Care Organization of choice. If you have any questions concerning OEHP, my experience with them over the years, or my recommendation please feel free to contact me directly as follows:
